

Biomanufacturing Challenges of Immunotherapy

13 - 17 of November

2017

The third edition of this workshop will be held in Havana during November 2017, organized by the Center of Molecular Immunology (CIM). The workshop will continue to be held every two years. In last meeting (2015) more than one hundred works were presented in both modalities: lectures and posters. The last edition was successful in engaging participants in fruitful discussion on technical hurdles in the expansion of immunotherapeutic agents' availability for extended use in treatment of several diseases.

Since our last meeting the potential and achievements of the immunotherapy field has continued to grow. Recently, in the annual meeting of the American Society of Clinical Oncology (ASCO) ratified an increase in the use of immunotherapy for cancer, with the potential demand expected to reach more than 50% of all cancer treatments. Unfortunately, development time and costs for new immunotherapy drug candidates has also continued to grow, which makes the use of these medicines unavailable for most of the patients who need the treatments.

CIM invites the scientific community to meet again in Havana to discuss the recent advances in product development and manufacturing technologies for immunotherapy. Lectures and posters will be accepted covering topics like:

- Cell line development
- Culture for glycoprotein and antibody production
- Technology for therapeutic vaccines
- Downstream platforms
- Formulation development
- Quality and regulatory trends
- Biotherapeutics products characterization
- Business Challenges & process economics

It is also an excellent opportunity to learn about Cuban Biotech achievements, visit scientific centers and enjoy the beauty of old Havana.

Key Dates:

Second Call: May 15th, 2017

Deadline for Sponsor Registration: July 31st, 2017

Deadline for Submission of Abstracts: September 1st, 2017

Deadline for Registration: October 9th, 2017

Conference date: November 13-17, 2017

Biomanufacturing Challenges of Immunotherapy

13 - 17 of November

2017

The Organizing Committee would like to invite you to become participant or sponsor of this conference:

PARTICIPANT

Participant Fee

300 euros

- > Events Materials
- > Welcoming Cocktail
- > Farewell Cocktail
- > Coffee break/Lunch
- > Other activities

SPONSOR

Sponsor Fee

6000 euros

Announcement:

In all oral sessions and social activities

Sponsor Logo:

Printed in conference materials and participants badges

Lecture/Workshop:

Designate one or more scientific speakers. A complete one-hour workshop for commercial products introduction could be also organized.

Commercial Poster:

In Poster Session and Conference Session

Stand: to be discussed on request.

If you would like to be involved or require more information, please visit our webpage <http://biomit.cim.co.cu> and feel free to contact Scientific and Organizing Committee.
